

KABOSUBABY: Mining Joy and Trading Trust

Introduction to KABOSUBABY

Welcome to the world of KABOSUBABY - an exciting and creative meme token inspired by the adorable image of a baby dog.

KABOSUBABY is not just a token but a symbol of joy, creativity, and the development of blockchain technology in the meme-loving community.

Tokenomics of KABOSUBABY

KABOSUBABY is built with a clear and transparent tokenomics structure to ensure maximum benefits for the user community and investors.

Participating in early mining of KABOSUBABY not only helps you own a large number of tokens at a lower cost but also brings many other attractive benefits:

- Higher Rewards: Early miners will receive higher rewards thanks to the initial mining reward system. This means you will have the opportunity to own more KABOSUBABY compared to joining later.
- Lower Mining Costs: When the network is still new and not many participants, mining costs (including transaction and energy fees) will be lower, optimizing profits for early miners.
- Increased Token Value: As the KABOSUBABY ecosystem develops and attracts more users, the demand for owning tokens will increase, pushing the value of KABOSUBABY higher. Owning tokens early will bring significant financial benefits when the token value increases.
- Contributing to Community Development: Early participants will have the opportunity to contribute ideas and participate in the development of the KABOSUBABY ecosystem, thereby helping shape the future of the community.

Vision and Mission of KABOSUBABY

The core of the KABOSUBABY ecosystem is a unique decentralized market where users can mine KABOSUBABY through miners in the new ecosystem, trade, and earn money by selling miners.

In the future, KABOSUBABY will integrate GameFi elements, bringing a play-to-earn experience for users. This ecosystem is built on the foundation of smart contract technology and a decentralized governance framework, ensuring transparent and fair asset transactions, fostering trust and reliability within the community.

Join Us! Join the KABOSUBABY ecosystem today to become part of an innovative and potential meme token revolution. Let's explore, mine, and develop KABOSUBABY together, taking this community to new heights.

We believe that with your creativity and enthusiasm, KABOSUBABY will become a prominent symbol in the crypto world.

Terms and Instructions for Renting a KABOSUBABY Miner

To rent a KABOSUBABY Miner for just \$250, follow these detailed steps:

1. Copy the Referral Link of the Referrer: Paste this link into the web browser of your wallet.
2. Rent a Miner: A wallet can rent multiple miners to increase the number of KABOSUBABY. Ensure your wallet account always has a balance of \$250 and BNB to cover gas fees.
3. Mining Frequency of the Miner: The mining rate will halve every 6 months:
 - Cycle 1: 1200 coins/24h.
 - Cycle 2: 600 coins/24h.
 - Cycle 3: 300 coins/24h.
 - Cycle 4: 150 coins/24h.
4. Benefits of Activating a \$250 Miner: You will immediately receive \$100 worth of KABOSU coins that are already tradable on Dex exchanges. You can withdraw and trade them immediately or hold onto them with the expectation of x10, x100, x1000 with the KABOSU meme coin.

Additionally, you will receive a ticket (ID) equivalent to one miner as a Jackpot position reward, deserving from the first exit cycle to the ninth cycle with corresponding amounts up to \$500000 as follows:

- First time: \$150
- Second time: \$300
- Third time: \$1000 (automatic activation of 1 new ID)
- Fourth time: \$3000 (automatic activation of 3 new IDs)
- Fifth time: \$7000 (automatic activation of 7 new IDs)
- Sixth time: \$15000 (automatic activation of 15 new IDs)
- Seventh time: \$50000 (automatic activation of 50 new IDs)

- Eighth time: \$100000 (automatic activation of 100 new IDs)
- Ninth time: \$500000 (automatic activation of 500 new IDs)

The system will automatically activate new miners (IDs) for you and you will receive immediate rewards.

With a cycle coefficient of 7, each ID (Jackpot ticket) can receive a recurring cycle until the end of the ninth cycle. The cycle is determined based on the time parameter of activating the miners of each ID and is arranged from top to bottom and left to right with no condition for overflow.
